**Food Security Screening** 

# OREGON CHILD DEVELOPMENT COALITION

# Food Security Screening Learner's Packet

#### **After This Workshop**

Participants will be able to perform the Food Security Screening within home visiting and family partnership practices. Participants will respect the stigma and cultural and linguistic sensitivity in screening for hunger and adequately provide resources and referrals using identified community resources and supports.

#### **In This Workshop**

When given a practice scenario, participants will properly provide an orientation to the screening, perform the screening, determine risk, and make appropriate plans of action for follow-up and reflect on their future screening practice.

#### Relevance

Food insecurity and childhood hunger are national and state issues. Children and families enrolled at OCDC are at a greater risk for experiencing food insecurity, hunger, and related health problems. This greater risk is based on their economic status, access to healthy foods, environments that support healthy living, and nutritional education. The OCDC Health Service Advisory Committee (HSAC) has recommended a practice of universal screening to address and support food insecurity and hunger in children and families. Staff members need to be trained in this new practice and use of the screening tool.

# A Place at the Table Discussion Questions:

- 1) Was there a character whose story your found particularly moving? How so?
- 2) What did you learn from the film that you didn't know already? Has it changed your perspective in any way? If so, how?
- 3) Based on what you already know about your community and what you learned from the film, what are your thoughts about the resources you can provide versus the challenges you will face to support families like those in the film?

#### Consider:

Food deserts, food swamps, malnourishment, obesity, low living wages, eligibility requirements for food assistance, availability of meal programs, proximity of grocery stores, high cost of produce versus low cost of high-calorie foods, government money (subsidies) for agriculture, political power of the business of agriculture, cuts to funding for social service programs...

Notes	

#### **Definitions & Prevalence**

Write in the correct term for the definition provided using the following terms: Food Insecurity, **Food Insufficiency, Food Security, Hunger** 

Term	Definitions
	an inadequate amount of food due to lack of resources
	having access to enough food for an active, healthy life
	the limited availability of nutritious or safe foods, and/or the limited ability to get food in ways that are socially acceptable
	a situation where household members unwillingly go without food for periods of time

# **Levels of Food Security**

Food Security	High food security	No reported signs of food-access problems or limitations.
	Marginal food security	One or two reported signs - typically of anxiety over food sufficiency or shortage of food in the house. Little or no signs of changes in diets or food intake.
Food Insecurity without hunger	Low food security	Reports or reduced quality, variety, or desirability of diet. Little or no indication of reduced food intake
Food Insecurity with hunger	Very low food security	Reports of multiple indications of disrupted eating patterns and reduced food intake

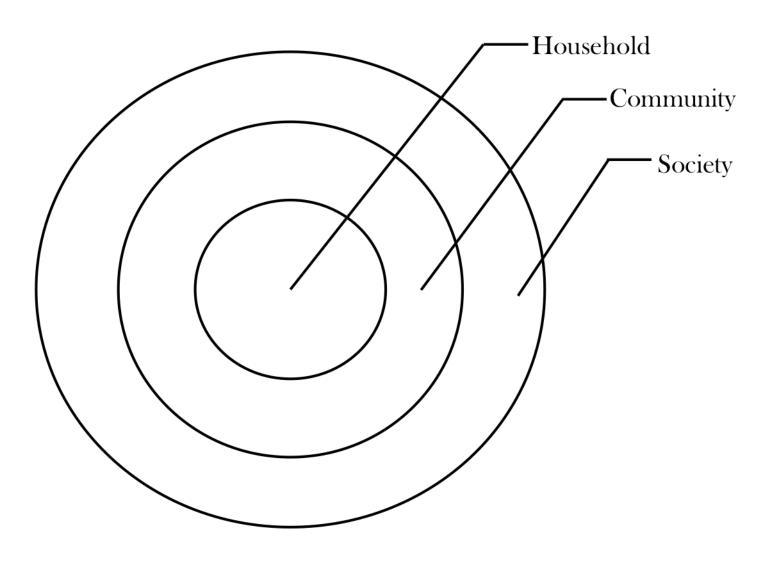

has among some of the \_\_\_\_\_ hunger rates in the U.S.

# **Characteristics Influencing Food Insecurity**

What society, community, and household characteristics influence the experience of food insecurity?

# **Familiarizing Others to the Screening**

# **Possible Orientation Strategies:**

- · Provide information, such as why and how we screen
- · Ask open-ended questions to learn
  - o Other's perspective
  - o How the screening is relevant to their past experiences
  - o Understand what their expectations are
- · Clarify their role as well as ours
- Give an opportunity to ask questions
- · Obtain permission from family to move forward

I know that the families I serve may be facing the challenges and effects of food insecurity and hunger. I also know that because of stigma, there could be some challenges in talking about these issues with families. To help me during conversations about food insecurity and hunger, I have the following tools:
Even though it may take courage for me to open up a discussion about food insecurity and hunger, I feel committed to do so because I know:
It is my hope that through collecting data on food insecurity and hunger and/or connecting families to related resources, I will be able to:
