

PARTNERING WITH FAMILIES: RESPONDING TO A TODDLER'S PERSONAL INTERESTS

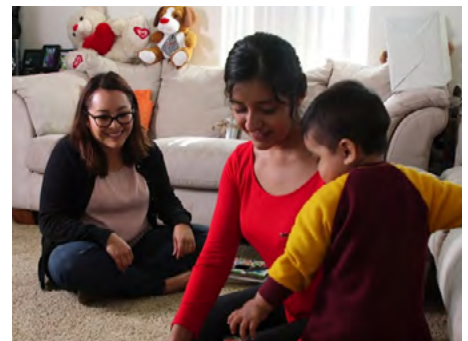

The curriculum Luz's program uses provides guidance about using the home as a learning environment. It also suggests a learning experience in which children put objects into a container and take them out. Use this handout to write down what you notice about how the parent and Luz work together to use the home as a learning environment and provide learning experiences that build on and extend the child's interests.

- What objects or materials does the child show interest in exploring?

- What ELOF skills, behaviors, and concepts are promoted through this activity? What range of skills, behaviors, and concepts does the child need to demonstrate to be successful in this activity?

- What objects or materials does the child show interest in exploring?

- What ELOF skills, behaviors, and concepts are promoted through this activity? What range of skills, behaviors, and concepts does the child need to demonstrate to be successful in this activity?

- How do you think Luz used the curriculum's guidance responsively with this family and child?
