

Walking in the Hallway

My name is _____ and I am _____ years old.
I go to preschool at _____.

I do many different fun activities at school like free play, snack, circle, outside play, and more. Some of the activities are in our classroom and some of our activities are in different places in our building.

When we go to different places in the building we walk in the hallway. To go to _____ and _____, we walk in the hallway.

When we walk in the hallway I know how to stay safe by:

1. Staying in line by carefully walking behind the child in front of me
2. Keeping my hands to myself
3. Keeping a quiet mouth

Running and talking loudly are fun things to do outside, but when I am walking in the hallway, I know how to stay safe.

It feels good to stay safe in the hallway by staying in line, keeping my hands to myself, and keeping a quiet mouth. This helps us all move safely to activities in different places in our building.
