

Geometry and Spatial Sense, Video 3

Javion: Me Javion.

Woman: Javion. You Javion. How are you?

Javion: My mommy friend.

Woman: That's your mommy, yes.

Javion: That's my friend!

Woman: Anything new this week with Javion?

Javion: That's my friend!

Woman: You been doing anything this week with Javion? Anything new?

Javion: That's my mommy.

Chassidy: We've been working on that.

Woman: Good.

Chassidy: And then he'd been watching some cartoons like "Team Umizoomi" and all that stuff and learning how they do it.

Woman: Oh, okay. Good. Is he able to match the colors and make the shapes? You like this? So this is really good to do, Chassidy, because it will help with math. He's learning to make patterns out of the colors and shapes and pictures. So keep doing this with him, okay? Is he pretty much -- Are you putting the colors on here?

Javion: Yeah.

Woman: Are you?

Javion: Yeah, I-I draw this.

Woman: Good! Good job! You did it with your mommy?

Javion: Yeah.

Woman: You made pictures?

Javion: I helped.

Woman: You helped her? Good job, Javion. Well, we're gonna do some other fun stuff today with your mommy. All right? We're gonna talk about shapes today. We're gonna talk about different things about shapes. So here's a book that I got, and it has shapes in it. And on -- If you'll see, Chassidy, it has shapes on the side. And so if you can find a shape, a square in the picture and you can help him find the square like here. And find the hearts. Two hearts.

See if he can find the two hearts. And then if you want to, you can have him count. So you can do a little math. Okay.

Javion: Okay.

Woman: Okay? You want to do that with your mommy?

Javion: Okay!

Woman: Yes! Good.

Chassidy: Find the triangles on the wave. You see the triangles? Where are they at over here? No, that's a ducky. Where are the triangles? Good job.
